

AMERICA'S BEST DEFENSE AGAINST DOCUMENT FRAUD

MARKETPLACE CHALLENGE

Vital records, genesis documents, social security cards, passports – no documents are more important than those created by our government. From Federal agencies to village records offices, government documents carry the weight of law, establishing final authority and verifying information at the highest level. Yet with advanced digital scanners and copiers these documents are all too easily reproduced, compromising our nation's security, devaluing civic trust and putting us all at risk. Whether they are used to gain illegal access, steal identities or misappropriate funds, counterfeit government documents pose a serious criminal and homeland security threat.

AUTHENTIGUARD® SOLUTION

Document Security Systems has proven security solutions designed to ensure authenticity of any government document making it virtually impossible to create or use counterfeit copies. Whether it's government building access, control chain management, or even homeland security protection, our AuthentiGuard® technology suite includes overt and covert solutions that are highly advanced and can provide a level of security that cannot be compromised.

Document Security Systems is your essential partner in securing Federal, State or Local government genesis documents, vital records and all forms of identification. Contact us today to develop customized solutions to ensure that your documents are protected by the industry's best defense.
